

Please reject the NAB petition 04-160. I am a subscriber to XM satellite radio and cannot find any reason why my service should be limited by local radio broadcasters.

We live in a capitalist society, not a socialist or communist one. To use government vehicles to squash competition is, at the least, un-American.

Please recognize that the newfound competition between satellite and terrestrial radio factions is a POSITIVE byproduct of the growing success of satellite radio, not something to fear.

Sincerely,

Randal Burgess
